THE BAND · NO FILLER

DISTORTED BASS. HARD DRUMS. NO EMPTY SPACE.

Electric Purge is an alternative rock duo from Varaždin, Croatia, built on distorted bass, explosive drums and an emotionally charged vocal. With only two people on stage, they create a sound designed to feel much larger than the lineup.

LONG BIO

Formed in 2021, Electric Purge turn the limitations of a duo into their main strength: every part has weight, every pause matters, and every live arrangement is built around impact. Marko Domjan drives the songs with bass and a powerful lead vocal, while Emil Kranjčić shapes the dynamics from behind the kit. The result moves between modern alternative rock, garage grit and arena-sized melody without adding a third person to the stage.

After a run of singles and videos, the duo released the debut album *It's Happening!!!* in July 2025. The visual campaign around the record and the breakout video *In My Mind* pushed the band beyond its local circuit, while club and festival appearances across Croatia confirmed the songs in their natural setting: loud and live.
